The winners and nominees can use the coveted seal in their marketing activities and enjoy increased media interest and additional marketing support.

Sustainability, environmental protection and social awareness are increasingly the focus of manufacturers and end consumers.

This means it is important to promote social values in companies and communicate them to the public. After all, our Earth is unique and irreplaceable.

We cannot start early enough to make even the very young aware of these topics. And toys made of various ecological materials not only protect the environment but are also great fun.

We have already dedicated a trend to this industry development in 2020 and received a great response from visitors, exhibitors and the international press. For the Spielwarenmesse 2021, we are therefore giving the subject of sustainability an extensive digital platform. The focus is on the categories Natural raw materials, Biobased plastics, Re-/Upcycling, Games and learning contents.

What our exhibitors are saying:

The background of the entire page is a close-up, slightly out-of-focus photograph of several colorful beaded garlands. The beads are in various colors including blue, yellow, orange, purple, and silver, and are strung on thin, light-colored cords. The garlands are draped and intertwined, creating a vibrant and textured pattern.
